

Project Description

Project Overview

Several trail projects have been completed for Valparaiso Parks Department. Included in these projects are: Creekside Golf Course (and Trail), the Cumberland Crossing Loop Trail, and the Valparaiso High School/Ogden Gardens Park Trail.

Project Design Responsibilities

DABEC was acting as a sub-consultant on this project to Lehman and Lehman, Inc. DABEC's responsibilities included primarily boundary and topographical survey duties, with some technical engineering consultation.

Site Constraints

All of these projects were very time sensitive and required survey work to be completed immediately to allow the Parks Department to stay within its schedule for project completion. The Creekside Golf Course project was also situated along and across Salt Creek, one of the regions prime salmonid streams and a highly-protected natural resource.
